

JESÚS ALEJANDRO RODRÍGUEZ MEDINA

Cybersecurity Intern | AppSec & Cloud Security | Student at Universidad ONMEX

Mexico City, MX • +52 (55) 23-4285-57 • acuarnest@gmail.com • [LinkedIn](#) • [GitHub/Alekey2001](#)

PROFESSIONAL SUMMARY

Cybersecurity Specialist student with a strong background in Fullstack & Mobile development (2+ years of hands-on building experience). Specialized in bridging the gap between secure code deployment and infrastructure defense. Proven experience conducting web vulnerability assessments (OWASP Top 10) and deploying secure environments on AWS. Fluent in English (B2) and looking for professional internships (prácticas profesionales) or Trainee roles in SOC, AppSec, or Cloud Security.

EDUCATION

Technical Degree in Cybersecurity – Specialist | Universidad ONMEX

Nov 2024 – Present | GPA: 8.2 / 10.0 – Academic Distinction

- **Relevant Coursework:** Vulnerability Analysis, Cloud Security (AWS/Azure), TCP/IP Networking, Risk Management, ISO 27001, Incident Response, System Hardening.

TECHNICAL EXPERIENCE

Web Developer & Security Analyst | Bausen / AIACO

January 2024 – Present

- Performed dedicated web security reviews and vulnerability scanning (April – May 2026) using Nmap and Nessus on live client environments; produced formal remediation reports following OWASP Top 10 guidelines.
- Developed and migrated responsive web platforms utilizing React 18, Vite, Tailwind CSS, and Node.js, achieving a 30% improvement in load speeds through asset optimization.
- Integrated security-first principles into frontend and mobile architectures, utilizing efficient JavaScript algorithms to reduce critical module complexity by 40%.
- Designed and simulated secure mobile application flows incorporating input validation, secure authentication mechanisms, and IAM-based access controls.
- Configured AWS EC2 instances and IAM policies to align deployment workflows with secure production baselines.

PROJECTS & LABS

DevSecOps Secure Pipeline on AWS | Personal Lab | GitHub: [Alekey2001/devsecops-secure-pipeline](#)

2025 – 2026 | 90% Complete

- Engineered a secure Node.js backend application from scratch implementing HTTPS enforcement, input validation, rate limiting, and secure headers (Helmet.js).
- Deployed application to an AWS EC2 instance, enforcing SSH key-based authentication, hardening server parameters, and configuring rigid Security Groups.
- Integrated automated intrusion detection and threat mitigation utilizing Fail2ban to auto-ban brute-force IPs, generating logs aligned with SOC triage workflows.

Ethical Hacking Labs | PortSwigger Web Security Academy | GitHub:

[Alekey2001/LABwebSecurityAcademy](#)

2025 – 2026 | 70% Complete

- Completed hands-on offensive labs covering Path Traversal, Access Control bypass, Authentication flaws, and Server-Side Request Forgery (SSRF).
- Utilized Burp Suite for request interception, parameter fuzzing, and security fix validation.

TECHNICAL SKILLS

Cybersecurity & Tools: OWASP Top 10, Burp Suite, Nmap, Nessus, Wireshark, SAST/DAST, Risk Assessment, ISO 27001

SOC & Networking: Log Analysis, Incident Response basics, Alert Triage, TCP/IP, Linux/Kali Linux, Windows Server, Active Directory basics

Development & Cloud: JavaScript (ES6+), React 18, Node.js, HTML5/CSS3, Tailwind CSS, AWS (EC2, IAM, Security Groups), Fail2ban, Git/GitHub

Languages: Spanish (Native) | English (B2 – Technical Reading, Writing & Documentation)

CERTIFICATIONS

- ▶ Cybersecurity Fundamentals – IBM (2024) — Focus on Identity & Access Management (IAM)
- ▶ Mobile App Development – Google (2024)
- ▶ JavaScript Algorithms and Data Structures – freeCodeCamp (2024)
